

About Stream Smart

Stream Smart is an educational collaborative consisting of municipalities, local organizations, agencies, and others. The program is designed to increase awareness about choices we make and how they impact our local streams and rivers. **Stream Smart** practices, such as picking up after your pet and restoring streamside areas with native trees and shrubs, helps prevent water pollution and improve water quality. By providing information, resources, and tools that individuals need to make **Stream Smart** choices, we help empower everyone to do their part to turn our streams from brown to blue - change starts with you!

Take Action & Volunteer

As a community member, there's a lot that you can do to be **Stream Smart** at home and in your yard and garden, including picking up after your pets, reducing or eliminating herbicide and pesticide use, maintaining your vehicles (no leaks!), and using less water. At your place of business, recycling as many materials as possible and encouraging the proper storage and disposal of garbage and hazardous wastes (solvents, degreasers, corrosives, and batteries) is **Stream Smart**.

Become a **Stream Smart** volunteer! Help with creek and river clean-ups, participate in planting and weed pulling activities, attend community events, and participate as an instructor for Salmon Watch! To learn more about our Adopt-A-Greenway, Bear Creek Stewardship Day, Rogue River Clean-Up, and Let's Pull Together! programs, visit our website.

What We Do

The **Stream Smart** Team works to improve watershed health and water quality throughout the Rogue Basin. Members of the team monitor water quality, restore riparian areas by removing invasive species and planting native species, provide habitat for pollinators, provide clean drinking water, conduct education and outreach programs, organize volunteer stream clean-ups and other activities, and improve water quality by managing pollution from urban runoff and other sources.

Success Stories

Stream Smart connects individuals and groups to make positive changes within the Rogue Valley. **Stream Smart** has coordinated successful programs and events, including Rogue Basin Salmon Watch, the Salmon Watch Traveling Road Show, creek and river clean-ups, Adopt-A-Greenway efforts at the Pine Street Greenway entrance, Adopt-A-River activities, the Bear Creek Restoration Initiative (BCRI), regional water quality monitoring, and other volunteer programs.
